

Biomedicine International Summer School

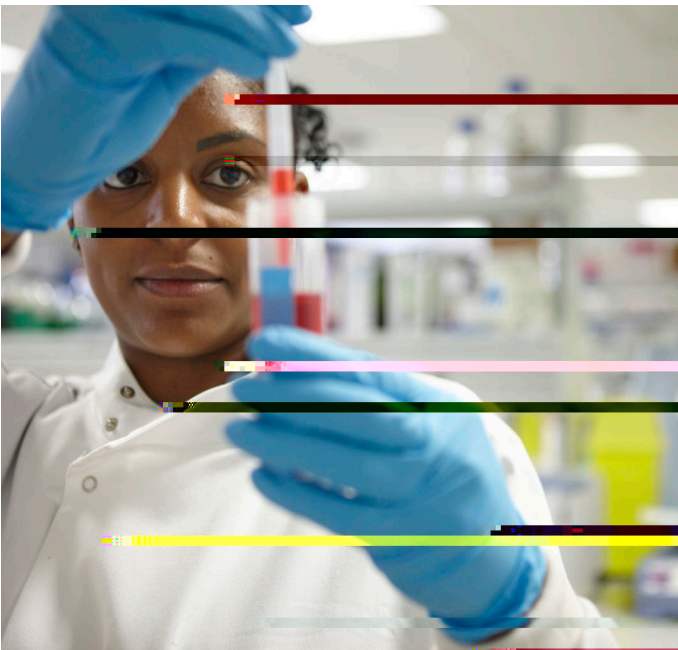

Cardiff University School of Biosciences is one of the largest life science departments in the UK with an international reputation for its teaching and research. With two Nobel Prize winners and numerous Fellows of the Royal Society contributing to the internationally renowned research programmes here in the School of Biosciences, the Biomedicine curriculum is therefore underpinned by our cutting edge research which addresses global health issues such as dementia, cancer, infectious diseases and heart disease. The Summer School offers a unique experience in sampling one of the top research-driven biomedical curricula in the UK in the beautiful setting of Cardiff city centre.

Overview of the programme

are authoritative figures in the fields that they teach.

focus on subject-specific skills such as bioinformatics
as well as transferable skills such as effective scientific

Learning outcomes

Knowledge and understanding

current perspectives in this field of research.

Practical scientific skills

Perform scientific procedures including gel

Solve mathematical calculations in a scientific context.

Academic skills

Communicate scientific information orally in a PowerPoint

Critically analyse scientific research.

Tuition fees

Monday to Friday), pick up and drop off from Heathrow Airport on fixed dates (pick up is on 15th July and drop off

Admissions requirements

English language proficiency: students should provide evidence of English language proficiency to a minimum level equivalent to IELTS 5.5. Other forms of English proficiency test certificate will also be considered. Students

Preliminary schedule

(subject to change)

Scientific communications	nsntb
14:00 - 17:00
